|--|---------------|
| Date of interim/final analysis                       | 02 April 2017 |
| Is this the analysis of the primary completion data? | No            |
| Global end of trial reached?                         | Yes           |
| Global end of trial date                             | 02 April 2017 |
| Was the trial ended prematurely?                     | Yes           |

Notes:

#### General information about the trial

Main objective of the trial:

The study had 2 parts: Part A (F506-CL-0404A) and Part B (F506-CL-0404B). The objective of F506-CL-0404A was to monitor the safety of and efficacy of Modigraf® (tacrolimus granules) in stable paediatric allograft recipients.

The objective of F506-CL-0404B was to monitor dose changes and tacrolimus whole blood trough levels after conversion from a tacrolimus granules based immunosuppression regimen to a Prograf® (tacrolimus capsules) based immunosuppression regimen.

Part A was completed as planned, however the study was terminated during Part B due to low enrollment in Part B.

#### Protection of trial subjects:

This clinical study was written, conducted and reported in accordance with the protocol, International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice (GCP) Guidelines, and applicable local regulations, including the European Directive 2001/20/EC, on the protection of human rights, and with the ethical principles that have their origin in the Declaration of Helsinki. Astellas ensures that the use and disclosure of protected health information (PHI) obtained during a research study complies with the federal, national and/or regional legislation related to the privacy and protection of personal information.

#### Subject disposition

#### Recruitment

Recruitment details:

Children aged  $\leq$  12 years were enrolled at 11 sites in a total of 6 countries: UK (2 sites), Spain (3 sites), Germany (2 sites), Belgium (1 site), Poland (1 site) and France (2 sites).

#### **Pre-assignment**

Screening details:

Daviad 1

Pediatric participants who had undergone liver, kidney or heart transplantation and who had previously participated F506-CL-0403 study were enrolled in Part A of this study. Participants who participated in Part A or F506-CL-0403 and who were converted to receive tacrolimus capsules were enrolled in Part B.

| Period 1                     |  |  |
|------------------------------|--|--|

| Blinding used                | Not blinded                                    |  |
| Arms                         |  |  |
| Are arms mutually exclusive? | Yes  |  |
| Arm title                    | Part A: Heart Transplant (Tacrolimus granules) |  |

#### Arm description:

In Part A of the study, participants who were heart transplant recipients received tacrolimus granulesbased immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

| Arm type                               | Experimental                 |
|--|------------------------------|
| Investigational medicinal product name | Tacrolimus granules          |
| Investigational medicinal product code | FK506                        |
| Other name                             | Modigraf®                    |
| Pharmaceutical forms                   | Granules for oral suspension |
| Routes of administration               | Oral use                     |

#### Dosage and administration details:

Participants received the same dose regimen of tacrolimus granules as they were receiving at the end of the F506-CL-0403 study, and the first dose was administered on day 1. Subsequent oral tacrolimus doses were adjusted by the investigator based on clinical evidence of efficacy and occurrence of adverse events and observing the recommended whole blood trough level range of 5 to 20 ng/ml. The tacrolimus granules for oral suspension were available in sachets containing either 0.2 mg or 1 mg tacrolimus granules per sachet.

| Arm title | Part A: Liver Transplant (Tacrolimus granules) |
|-----------|--|
|-----------|--|

#### Arm description:

In Part A of the study, participants who were liver transplant recipients received tacrolimus granulesbased immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

#### Arms

### Arm title Part B: All Participants (Tacrolimus capsules)

#### Arm description:

In Part B of the study, participants who were heart, kidney or liver transplant recipients and who were converted from tacrolimus granules-based immunosuppression regimen, received tacrolimus capsules twice daily for 1 month and thereafter received commercially available tacrolimus capsules.

| Arm type                               | Experimental           |
|--|------------------------|
| Investigational medicinal product name | Tacrolimus capsules    |
| Investigational medicinal product code | FK506                  |
|  |                        |
| Other name                             | Prograf®               |
| Other name Pharmaceutical forms        | Prograf® Capsule, hard |

#### Dosage and administration details:

Participants received an initial daily dose of tacrolimus capsules that is identical to the daily dose of tacrolimus granules prior to conversion to tacrolimus capsules and was administered on day 1. Subsequent oral tacrolimus doses were adjusted based on clinical evidence of efficacy and occurrence of adverse events, and observed the recommended whole blood trough level range of 5 to 20 ng/ml. Tacrolimus capsules contained 0.5 mg, 1 mg or 5 mg of tacrolimus per capsule.

#### **Primary: Part A: Number of Participants with Acute Rejection Episodes**

|--|

#### End point description:

Rejection episodes/acute rejections were indicated by clinical and/or laboratory signs, and were classified according to their rejection specific treatment: •Spontaneously Resolving Acute Rejection: not treated with new or increased corticosteroid medication, antibodies or any other medication and resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Sensitive Acute Rejection: treated with new or increased corticosteroid medication only and which has resolved, irrespective of any tacrolimus dose changes; •Corticosteroid Resistant Acute Rejection: did not resolve following treatment with corticosteroids; - Resolved with further treatment: any acute rejection with an end date AND a treatment other than corticosteroid used; - Unresolved with no further treatment: any acute rejection with no end date AND ONLY corticosteroid treatment was used. SAF.

End point type Primary

End point timeframe:

Up to 12 months

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: As this is a single-arm study, there were no pre-determined hypothetical or comparative statistical analyses performed in Part A of the study.

#### **Primary: Part A: Severity of BPARs**

| End point title | Part A: Severity of BPARs <sup>[2]</sup> |
|-----------------|--|

End point description:

The severity of BPARs was categorized with specific criteria by organ: For kidney transplant participants, according to Banff '97 Diagnostic categories for renal allograft biopsies – Banff '07 update (C4d deposition, Acute antibody-mediated rejection I, II, and III, Acute T cell mediated rejection IA, IB, IIA, IIB and III); for liver transplant participants, according to 1997 Banff Schema for Grading of Liver Allograft Rejection - Rejection Activity Index score (sum of grades: 1-mild, 2-moderate, 3-severe; range from 0-9); for heart, according to Standardized Nomenclature of the International Society of Heart and Lung Transplantation - Standardised Cardiac Biopsy Grading: Acute Cellular Rejection 2004 (mild, moderate, severe). The analysis population was the Safety Analysis Set (SAF), which consisted of participants took at least 1 dose of study drug. Categories not applicable to the reporting groups are denoted as "99999."

In Part A of the study, participants who were heart transplant recipients received tacrolimus granulesbased immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

| Reporting group title | Part A: Liver Transplant (Tacrolimus granules) |
|-----------------------|--|
|                       | •  |

#### Reporting group description:

In Part A of the study, participants who were liver transplant recipients received tacrolimus granulesbased immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

| Reporting group title | Part A: Kidney Transplant (Tacrolimus granules) |
|-----------------------|---|
|-----------------------|---|

#### Reporting group description:

In Part A of the study, participants who were kidney transplant recipients received tacrolimus granulesbased immunosuppressive regimen twice daily for a maximum of 1 year or until commercial availability of tacrolimus granules in the participant's country.

| Reporting group title | Part B: All Participants (Tacrolimus capsules) |
|-----------------------|--|
|                       |  |

#### Reporting group description:

In Part B of the study, participants who were heart, kidney or liver transplant recipients and who were converted from tacrolimus granules-based immunosuppression regimen, received tacrolimus capsules twice daily for 1 month and thereafter received commercially available tacrolimus capsules.

|                                   |                |   |   |

## More information

## Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

## Interruptions (globally)

Were there any global interruptions to the trial? No

## **Limitations and caveats**

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

EU-CTR publication date: 29 July 2018

This study was terminated during Part B, due to low number of participants enrolled in Part B.

Notes:
